

COVID 19 – Update 12 – 25.03.20

Dear Marist Community,

I know that many of you are now worried about any cross-contact with COVID-19 cases at Marist College. We will receive information from the Ministry of Health **IF** there were to be a case that had close contact with any of our children/staff/parents.

We continue to send our love and support to the Marist College Community and pray that we will all come through this together. I will update you with information that comes to hand. Please rest assured Ministry of Health protocols are being followed.

NOTE: School Grounds/Playgrounds Must Close

We have just received the following urgent notification from the Ministry of Education:-

'Council grounds have closed down, and we have been getting multiple reports that children are going to school playgrounds as a result.

Can you please put signs up in your playgrounds letting your community know that your school and school grounds are closed. I know that your school and grounds will still be used today by the children of Essential Workers who are attending and they should be the only children on school grounds today.

From midnight tonight, there is a total lockdown and that means that no-one at all will be allowed on school grounds for the duration of the lockdown.'

Thank you for your understanding.

Stay safe, stay home.

*Much aroha,
Carolynn*
